- **Proficient:** JavaScript, React, Redux, NodeJS, Express, PostgreSQL, Git, GitHub, Postman, HTML5, CSS3, Python, Java
- **Exposure:** C, Expo, TypeScript, AWS, MongoDB, Jasmine, Material-UI, Tailwind CSS, Bootstrap

SOFTWARE DEVELOPMENT EXPERIENCE

Second-Shelf | Software Developer | [Github](#) | [Site](#)

2026

A full stack book marketplace platform supporting listing management, user interactions, and review workflows

- Developed RESTful APIs with Node.js/Express and integrated MongoDB for efficient data management.
- Implemented authentication and middleware to secure user actions and protect API endpoints.
- Debugged and improved system reliability while incorporating usability feedback to refine workflow.

The Sweet-Sap | Software Developer | [Github](#)

2022

A draft restaurant website where customers can find the menu and other information about the restaurant

- Independently designed and implemented backend features and REST APIs supporting core application functionality.
- Debugged and optimized application logic to improve performance and system stability
- Managed the full development lifecycle from design through testing and iteration

Note-ary | Software Developer | [Github](#)

2021

A Trello Clone website helping people plan out their tasks and duties within a team setting

- Developed frontend components using React and TypeScript to manage task workflows and application state
- Implemented backend API logic and collaborated across the stack to improve performance
- Participated in code reviews and followed established development practices to maintain clean, maintainable code

Kirby Cafe | Software Developer | [Github](#)

2021

A mock e-commerce website based on the game Super Smash Bros. selling different products

- Developed navigation bar, product list, login/signup, and update profile page using ReactJS, and ReduxJS to erect a 100% self-service profile setup and user experience.
- Formed users and products databases with Sequelize, and PostgreSQL to show users and products with 99% precision.
- Built users and products API routes with ExpressJS to create, update, and delete users and products on the server side.

OTHER PROFESSIONAL EXPERIENCE

Shop Online New York | React Developer Intern | New York, NY

March 2024- July 2024

- Connected with Team Lead and partners on task implementations during sprints which clarified tasks by 80%.
- Composed pair programming sessions for learning and debugging to implement a 100% functional application.

Yun and Yun Inc | Shipping/Delivery Clerk | Maspeth, NY

August 2023-present

- Distributed packages to different venues to ensure recipients received their items with 100% satisfaction.
- Aligned packages for trucks with FedEx App to ensure deliveries to precise stops with decreased travel time by 80%.

The Sweet Sap | Shift Manager | Flushing, NY

July 2021 - July 2022

- Arranged schedules for team servers using Microsoft Excel, and Gmail which improved staff's attendance by 50%.
- Briefed with supervisor to supply inventories using Microsoft Excel, and Gmail to maintain inventory levels at 100%.
- Edited menus and pricing for the restaurant's website using Wix, Adobe, and Microsoft Word to ensure that prices and ingredients were aligned with availability which helped increase profit and cost management by 18%
